5. Reorder screening questions

improve the user experience

- Work closely with product and engineering teams to develop and test new features and functionality
- Collaborate with marketing and sales teams to develop and execute promotional campaigns

What you'll need

- Strong proficiency in user experience design
- Solid understanding of user research methods
- Experience with wireframing and prototyping
- Ability to create user personas and journey maps
- Excellent attention to detail
- Strong problem-solving skills
- Portfolio showing previous user experience design work

At TokyoCloset, we are looking for a UX Designer who is part of a company that is focused on providing a competitive and innovative user experience. Applicants should have a strong background in user experience design and a portfolio that demonstrates their skills and experience.
